

1 page : design of 1 first page should look like this (currently is important to provide PI and project names, even it looks very overcrowded....)

## Eur-USH: European Research Projects on Rare Diseases driven by Young Investigators

## Patients

Displaying 1-3 of 3 results.

ID: [13](#)  
Systemid: PATIENT5228c3f316a48  
Gender: M  
Place of birth: PIETA'  
Date of birth: 02-09-2013  
Informed consent:  
Confirmed mutation: YES

ID: [14](#)  
Systemid: PATIENT5228c76e7baf8  
Gender:  
Place of birth:  
Date of birth: 01-01-1970  
Informed consent:  
Confirmed mutation:

For both last only YES  
or NO options for both

ID: [15](#)  
Systemid: PATIENT52298c3049e0c

4. Exclude, not relevant info

5. Include after confirmed mutation  
2 more fields: **"File complete"**: YES  
or NO options (appears YES, if all  
fields entered but for some reasons  
not submitted) and **"File  
submitted"** ": YES or NO options  
(appears YES, if submitted). NOTE:  
edition or deletion of submitted files  
only possible by contacting admin

Operations  
List All Patients  
Search Patients  
~~Create new patient~~  
Update Center Specific  
Data

2. Exclude (Information on  
top: thus here do not be  
doubled)

3. Button added on THIS  
page but changed to  
**"Update patients"** than  
when activating appears  
details s. 6 Page

4 page

1. Change all table to this one

2. Change to only 3 operations as in page 3

Patient Management Create new patient Families Logout (admin)

Home » Patients » Search

## Search Patients

Search criteria (than appears table bellow, it is enough for search 6 bellow criteria)

ID  
Centre  
Responsible Physician  
Gender  
Date of birth  
Diagnosis

) at the beginning of each of your search values to

### Operations

List All Patients  
Search Patients  
Delete Patient  
Update Center Specific Data  
Update General Patient Data  
Update Genetic Data  
Update Ophthalmologic Data

List All Patients  
Search Patients  
Update Patients

3. Exclude 3 buttons

4. Include 4 buttons: "Mutation confirmed", "Centre", "Responsible physician", "Data submitted" after Date

5. Exclude those empty windows

Displaying 1-3 of 3 results.

ID	Systemid	Gender	Place of birth	Date of birth	Informed consent
13	PATIENT5228c3f316a48	M	PIETA'	02-09-2013	
14	PATIENT5228c76c7baf8			01-01-1970	
15	PATIENT52298c3049e0c			01-01-1970	

6. One all data uploaded to the DB, and submit button clicked, no edition possible, and edition button should change to some other sign, delete button should not be active as well.

5 page/ All those search data and all possible data (your table) should be placed in “ Statistics » part and after placement required data appears in excel format, which is possible to look but import function activated only by “admin” (=Paris centre). Design should look like this:

Patient Management

Create new patient

Families

Statistics

Select Data

Select Operator

Enter value

General

Ophthalm

Otological

Genetics

One activated appears all data for general data, same for oph, oto, gen..

<

<=

,

>

>=

<>

or

=

Save

When clicked save button : it saved but not generated. This button is required

Saved

ID	Centre	Date of Birth	Visual acuity.....

Export

This part appears when clicked save button, and columns increases with each save value

When clicked export: possible to export as excel, this function only for “adm”

# Update General Patient Data

Fields with \* are required.

Center A (created patient) \*

University Of Malta

Center B

(Select a center)

Center C

(Select a center)

Responsible Physician Center A

Dr Alban2 test

Responsible Physician Center B

Responsible Physician Center C

Submit

Internal Id of Center A

1. Here should be selection function for all same and other, than should be entered by hand

Johannes Gutenberg University of Mainz  
Coimbra Coordinating Centre for Clinical Research  
University of Coimbra, Center for Hereditary Diseases and Visual Neurosciences Laboratory  
Institut de la Vision, Rare disease reference centre, INSERM  
Laboratoire de génétique moléculaire, INSERM  
Radboud University Nijmegen Medical Centre

## Operations

List All Patients

Search Patients

Delete Patient

Update Center Specific Data

Update General Patient Data

Update Genetics

Update Ophthalmologic Data

2. Same comment for operations as in page 3, after activating "Update Patient" appears in such order

Centre data  
General data  
Ophthalmology  
Otolaryngology  
Genetics

Diagnosis keys

Description

Operations

- List All Patients
- Search Patients
- Delete Patient
- Update Center Specific Data
- Update General Patient Data
- Update Genetic Data
- Update Ophthalmologic Data

1. Deleted, should be "ID" (generated automatically) Patient ID formation (first 3 letters of EUR-country two letters and sequential order generated by DB, entering new patient). For example centers entered in this order appears like this:

EUR-GE01  
EUR-PO02  
EUR-PO03  
EUR-FR04  
EUR-FR05  
EUR-NY06

Should not be change option !

2. Selection option by calendar to be entered by the same format

3. Selection option "YES" or "NO"

4. Include \*

5. Selectio option with add possibilities from ICD10

After “**description**” should be changed the order and buttons description like this:

**Family tree**

*Consanguinity Yes, no options*

*Affected family members\**

scroll options, from 0 to 30

*Parents’ geographic origin*

Mother

Farther

Upload pedigree:

## Ophthalmology - Anamnesis
